

Kömmerling®

TODAY FOR TOMORROW

LETTING NATURE BREATHE EASY

Kömmerling ReFrame

FOR YOUR HOME, FOR THE ENVIRONMENT

Windows for the future

With Kömmerling ReFrame, we are opening a whole new chapter in sustainability. These window profiles are not only made from 100% recycled PVC-U, they are all finished with a colour proCoverTec surface which stands for vibrant colours and excellent technical properties. For example, Kömmerling ReFrame profiles are extremely resistant to UV and protect against infrared reflection.

How can this be seen in practice? The windows retain their colour intensity for a long time; paint finishes, such as those on wooden windows, and colour restoration measures are not necessary. The windows also remain dimensionally stable for an extended period of time. This means that they are user-friendly to open and close without jamming, even after intensive use. Another major advantage is the high degree of energy efficiency of the recycled materials. What more could you ask for?

A WINDOW FOR LIFE

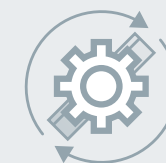

Our high-quality PVC-U windows have a minimum service life of 40 years. What's more, the PVC-U can be recycled eight times. In other words, our Kömmerling ReFrame window profiles can have a minimum life cycle of 320 years. This conserves resources and ensures a very circular material cycle.

Windows made from 100% recycled PVC-U

High-quality technical properties

Closed material cycle

High energy efficiency

OUR PROMISE

TO YOU AND THE ENVIRONMENT

IT DOESN'T GET MORE SUSTAINABLE THAN THIS: WINDOWS MADE FROM 100% RECYCLED PVC-U

We already have all of our products' futures in mind during the design and production stages. As a result, we have developed our own recycling programme to give the components and materials used a long life.

EXTENSIVE, SUSTAINABLE, EFFECTIVE

RECYCLING ALONG THE
ENTIRE LIFE CYCLE

proCoverTec

Colours that keep looking good and protect

Kömmerling ReFrame windows are not only compelling in their functionality but also in their design options. This is because proCoverTec surface coating is available in an abundance of colours. How about the green of a lush meadow, a bold signal red, an elegant grey or a classic white look? Whatever you choose, each shade is a sight to behold and offers added value – all of the colours protect against UV light and are dirt repellent.

- > A unique selection of many beautiful colours
- > Luxurious, matt appearance

OUR PROMISE TO YOU AND THE ENVIRONMENT

- > PVC-U materials accrued during window production and old PVC-U windows are collected and returned to us
- > We condition the PVC-U recycled materials and old PVC-U windows and use them to produce new window profiles
- > We only use high-quality and thoroughly controlled recycled materials to make our window profiles

#KömmerlingForTomorrow

Kömmerling ReFrame:

Responsible building and renovation:
Our Kömmerling ReFrame windows made
from 100% recycled PVC-U make this
possible.

We are part of the VinylPlus® initiative,
which, among other aims, promotes the
responsible use of energy, resources and
established recycling methods.
This is another sign of our commitment.

At Kömmerling, we advocate for sustainable
solutions in order to tackle plastic pollution
in the oceans. At the same time, we are true
pioneers – we were the first company in the
windows sector to receive the "Zero Pellet
Loss" certification. This label confirms that
we prevent plastic pellet losses across the
entire delivery chain.
